# Teams & Roles

## Content Production

The content production team is responsible for researching target keywords, using tools such as LSI Graph to identify relevant high-ranking content and LSI keywords. The content is developed in a collaborative setting. Inside Asana's editorial channel. Furthermore, content is optimized using tools such as Yoast SEO & published through Wordpress.

**Members:** Lucille Nawa – Editor & Team Lead  
Dimitar Petrov – Content Producer

## Brand Onboarding & Outreach

Brand onboarding is a very detailed process where brands go through a selection process and multiple layers of onboarding along with constant coordination between the content team and the product management team.

This process entails market research, data compilation, and entry, as well as thorough confirmation of brand ethics and social responsibility. After approval, the brand details are therefore uploaded onto Shopify, and brand products swiftly followed.

**Members:** Artem Meshcheryakov – Brand Outreach Expert

## Product & Inventory

Product Uploading and Inventory management of a marketplace entail eagle eye detail orientation, high accuracy, and impeccable cross-referencing. With a product inventory exceeding the thousand, updating stock using third-party wholesale platforms such as Faire and Ankorstore entails a thorough tracking system. Furthermore, products were individually or bulk uploaded using various plugins and supplementing them with data entry and multiple SEO Optimization steps.

**Members:** Erman Sen – Product & Inventory Management Expert
